-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance: See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 5-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nason- U.S. Patent # 5,869,003. As to claims 1-4 and 5-13, Nason discloses a self contained diagnostic test unit including a buffer container (reagent cap 16) with an interior 49', buffer fluid 48' and a weakened portion 39', a test strip 20 held by securement 56, a test strip container (18, 70, 76), a sample collector 12 for holding a sample 14/24 and shaped to receive buffer container 16 and having channeling member 64 with a lumen (outlet channel 66) wherein when the buffer container is squeezed as in embodiment of Fig. 8, membrane 39' is ruptured and reagent mixes with the sample from the lumen 66 to the wick 82 to the test strip 20, note figs. 1,2, 8 and 11-12 and col. 4, lines 4 et seq. Further, it is noted that Nason fails to specify a filter per se. However, there is included a wick 82 which is described as being a "porous sponge block" (col.7, lines 39-42). Therefore, it would have been obvious to one of ordinary skill in the art at the

time of the invention to have recognized that the pores in the sponge block perform a filtering function and hence designated the wick 82 as acting as a filter. As to claim 2, it appears that the test strip 20 is perpendicular to the wick filter 82, note fig. 4. As to claim 3, it appears that buffer container is press fit over the sample collector. Official notice is taken that usage of threading on either element in lieu of a press fit is old and well-known. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have substituted threading on either element for the press-fit as a clear matter of design choice equivalent in operation. As to claim 4, note projection sleeve 34' engaging collector outer surface in fig. 8. As to claims 6-7, note membrane seal 39' and compressible bulb 30'. As to claim 8, note window 28. As to claims 9-10, note sleeve 70 and plug 76. As to claim 11, note the associated method described with the apparatus of claim 1 in col. 6, lines 5 et seq. As to claims 12-13, note that nib 40' appears to act as a piercing member when the bulb is urged downward and compressed, note figs. 8-10.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nason in view of Weiler et al- U.S. Patent # 5,121,856. . As to claim 5, the bulb 30' is not bellowed. However, in a related prior art device, Weiler et al disclose a dispensing vial with bulb 127 in the form of a bellows-type cylinder 129 upon which there is placed a longitudinal compressive force, see fig. 9. Therefore, inclusion of such a bellows-type bulb would have been obvious to one of ordinary

skill in the art at the time of the invention to have included in the Nason device as a known alternative to the squeezing of the sides of the bulb.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nashmiya S. Fayyaz whose telephone number is 571-272-2192. The examiner can normally be reached on Mondays and Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on 571-272-2208. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
